

JIRA MISC WORKFLOW EXTENSIONS

for Jira Cloud, Server and Data Center

ALL-IN-ONE APP FOR BUILDING AND AUTOMATING JIRA WORKFLOWS

Whether you are creating a simple Jira project or a sophisticated one, with Jira Misc Workflow Extensions (JMWE) you can easily tailor your workflows to fit your specific needs. It lets you extend Jira's native features to quickly build and automate your business processes. For example:

**"It's incredibly
powerfull and equally
flexible. This is a
must-have add-on."**

- Joe Koch

- Automatically assign issues to users or send out custom action-based emails;
- Change availability of transitions based on different parameters, such as statuses of linked issues or sub-tasks;
- Automatically create one or multiple issue(s) during a transition;
- Automatically transition the parent issue when sub-tasks are transitioned (or linked issues, or Epic/Story...);
- And so much more.

SUPPORTS ANY NUMBER OF USE CASES!

Most, if not all, of your business scenarios can be deployed and automated with Jira Misc Workflow Extensions. That's why admins everywhere use JMWE to power millions of Jira users and consider it 'a must-have' extension.
